**You can study Medical Spanish
in Ecuador, Perú or Bolivia**

MEDICAL SPANISH PROGRAM

Program description:

The Medical Spanish program is designed for students and professionals of the medical sector and related fields, such as doctors, nurses, and similar professions. In this course you will enhance your Spanish medical vocabulary while you learn about the medical system in Ecuador/ Peru/ Bolivia. Through visits and practical experiences in hospitals and clinics you will get a real insight into the medical field in our countries.

The theory part of the course contains 20 Spanish lessons per week in a mini group: with a specialized teacher you will study medical vocabulary and terminology. Experts of the field hold lectures about the medical system in Ecuador/ Peru/ Bolivia and illustrate particularities and problems of the health sector and current circumstances in our hospitals, private clinics and other health institutions.

In the practical part you undertake field trips and visits to hospitals and private clinics, where you have the chance to observe doctors or nurses at work. You will accompany them in their daily tasks and duties and this way see the differences between working in the medical sector in a Latin American and your home country.

Accommodation during the whole program is provided in local host families so you are fully immersed in the Spanish language while getting to know our culture and our incredibly warm-hearted people. ***This is a unique opportunity to make friends for a lifetime from all over the world !!***

Program availability:	any Monday all year round
Time required:	from 3 weeks
Requirements:	advanced Spanish level necessary for students of medicine, doctors, nurses etc.
Program fee:	USD 430 per week
